

Inventing tomorrow

Reimagining partnerships,
work spaces & the tools we use

June 30 & July 1, 2021

GRENOBLE WTC CONVENTION CENTER

Press release
Grenoble, 14th June 2021

► 20 selected companies for the 24th edition of Venture 5i

Venture 5i® is the financing forum within the Forum 5i. Over two days, Venture 5i® offers excellent conditions for fundraising. Innovative companies from the Alpine region who seek investments have, in fact, the opportunity to meet national and international investors who can assist in their global expansion.

The Selection Committee is composed of a highly-regarded group of investors and professionals. Investors, researchers, industry experts and the like, the committee members all have expertise in the related industries. The Selection Committee is responsible for evaluating and selecting the companies that will be reviewed and offered to present during the event.

Composed of 30 investors, the 2021 selection committee received 70 applications, and selected 20 innovative, French and international startups. The Selection Committee of the Venture 2021 will be led by Damien Bretegnier, Supernova Invest.

"The Venture 5i is always a high-quality event that Supernova Invest has been participating in for several years and it is an honor to be able to chair the selection committee this year. This edition promises to be under the best auspices, with a large number of applications from startups, especially French and Swiss, and above all the quality we expect from such an event. Selecting the best startups in a quality context is always a delicate exercise, but we have finally managed to come up with a list of the 20 most promising startups that will pitch on June 30. I look forward to meeting my 25 French, German, Swiss, Belgian and Italian colleagues in this great DeepTech hub that is Grenoble to select the 2021 winners."

The diversity of application areas - material and transport technologies, through the medtech or energy and telecommunications - reflects the dynamism and willingness of the selected projects.

INDUSTRY & TECHNOLOGIES

AVIATHOR - Voiron (France)

Industrial Manufacturing - Material and Transport Technologies - FR
We electrify aviation for good.

www.aviathor.fr

MAGREESOURCE - Grenoble (France)

A Green Rare Earth Magnet Company.

www.magreesource.org

SOLEAN - Le Bourget-du-Lac (France)

Lean Solutions for the Solar Industry. www.solean.fr

KHEOOS - Moirans (France)

The first automated digital platform for the reuse of industrial maintenance spare parts.

<https://kheoos.com>

SMART PANEL - Le Bourget-du-Lac (France)

Creating a new building skin using bio-mimicry.

www.smart-panel.tech

IT & TELECOMMUNICATIONS

GLOBAL DATA EXCELLENCE (Switzerland)

The first AI platform for corporate governance that you can dialog with in natural language.

www.globaldataexcellence.com

MEDTECH

HYLOMORPH AG (Switzerland)

Preventing post-operative complications in implantable medical devices.

<https://www.hylomorph-medical.com/>

RECORNEA (Italy)

We develop the GROSSO® Implant, the first corneal metal implant to restore the physiological curvature of the cornea with clear and predictable clinical outcomes.

<https://www.recornea.com>

REMEDEE LABS - Meylan (France)

Redefining life with chronic pain. Thanks to the first endorphin stimulator combined with a digital service platform.

<https://remedeelabs.com/fr/>

STERILUX (Switzerland)

The first low temperature sterilization system based on natural and energy efficient principles.

<https://sterilux.tech>

ÉLECTRONICS

DIAMFAB – Grenoble (France)

Diamond, diamond electronics, semiconductor, power electronics, diamond wafer.

www.diamfab.com

HAWAI.TECH – Grenoble (France)

Hardware to accelerate next-generation AI models based on probabilistic reasoning.

www.hawai.tech

MIRAXESS – Lyon (France)

Our vision is clear, Miraxess unleashes the power of your smartphone, and make it the only computer you will ever need.

www.miraxess.com

ENVIRONMENT

GRID FRUIT (USA)

Harnessing data and the smart grid to keep food fresh with less energy.

www.gridfruit.com

HELIOCITY - Grenoble (France)

Assess and monitor the health of your solar power plants in the built environment to secure revenues whilst reducing operating costs.

www.heliocity.io

INSOLIGHT SA (Switzerland)

Insolight is developing solar modules designed for agrivoltaics, aiming to combine food and electricity production without tradeoffs.

www.insolight.ch

MOB-E-SCRAP – Paris (France)

A small and polyvalent unit to recycle composite materials with our delamination technology.

<http://mob-e-scrap.com>

RECYC'ELIT - Chasse-sur-Rhône (France)

Enhanced Recycling, PET, No Energy.

www.recyc-elit.com

SMARTHELIO (Switzerland)

SmartHelio has developed an edge computing IoT sensor which gives second life to solar panels by repair and reuse of solar panels to prevent e-waste. www.smarthelio.com

B2B SERVICES

SMARTER PLAN - St Maur-des-Fossés (France)

Enabling sustainable management of existing buildings and higher returns of built assets with a SaaS solution based on AI-powered digital twins.
